

Agreement

According to the report based on the completed questionnaires we came to the conclusion that the promotion of the region should increase. The respondents pointed the lack of materials that could promote the region for example booklets or maps. We also didn't have any materials in the English version that could promote the nature of the region. That's why after the agreement with the local government (the head of the Bircza Community and head of the Forestry Management in Bircza) we decided to make a brochure about the Helpful Water and the mugs as souvenirs.

In May and June 2014 we had some activities on the trekking path, we got to know its nature values and we took a lot of pictures. Then we wrote the English and Polish version of the booklet. In August we prepared the draft of the booklet and the mug for printing.

BOOKLET

We used the materials during the greens activities on the nature path with our partners from Comenius. We leave the brochures in places that are often visited by tourists (

Local Government, Forestry Management, hotel, shops). They are used as a valuable mean to promote our region.
